RSA efforts will help propel Rajasthan Solar scene to greater heights

Date: 28-August-23

Rajasthan Electricity Regulatory Commission (RERC) today released an important order of Grid Interactive Distributed Renewable Energy Generating Systems) Regulations, 2023.

RSA has been always vocal for industry and state public issues. RSA had provided suggestions for the same for growth of solar industry. Thanks to RERC that they have heard our demands in larger interest of state public.

Now solar installing is allowed with capacity up to 80% capacity of Distribution transformer which was earlier 50%

Now Extra power generated by customers will be purchased by Discoms, earlier it was wasted. It will be purchased at the rate of latest tariff plus 25%. It will attract residential consumers substantially.

Further now RESCO can be installed on Government building without any surcharges and it will bring more capacity for solar industry.

There is no restriction on DC capacity being installed now onwards and increased efficiency will be encouraged now.

Good news for idle lying roofs owners like warehouse where gross metering with attractive tariff is being provided

RSA is representing letters and memos highlighting the government orders which are obstructing solar growth and is big achievement after 3 year struggle

RSA congratulates RERC for issuing this great order.

“It will boost solar installations at a faster pace and propel solar growth to a large volume.” Sunil Bansal, President, RSA
